Time of its Extinction, being near *Orion*'s Right Shoulder, and the other near the Left Knee of *Boötes*; ſo that this Meteor ſeems pretty nearly to have accompanied the Earth in its diurnal Motion, and to have had little or no Motion beſides. I have looked for this Light ſince, but could find nothing like it.

The Day was exceeding fine, and by my Journal I find, that,

At Noon, the	Barometer was	29.98.
	Thermometer	57.
	Wind	Eaſt.
	Decl. of the Needle	14° 10′.
At 10 at Night,	Barometer	29.86.
	Thermometer	57.5.
	Decl. of the Needle	13° 50′.

XV. *An Account of the Caſe of a* Calculus *making its Way through an old* Cicatrix *in the* Perinæum, *by* David Hartley, *M. A.* F. R. S.

Jan. 12. 1740.

William Jarman, of the Pariſh of *Bayton* in *Suffolk*, was cut for the Stone about 15 Years ago, and a large Stone taken from him.

The ſaid *William Jarman* ſays, that he continued eaſy for about four Years after he was cut; that the Wound was quite healed up, and that he made Water in the natural Way, without any Leakage at the Wound.

In *July* laſt, he ſays, he felt great Pain at the Place where he was cut, and that it was much ſwelled.

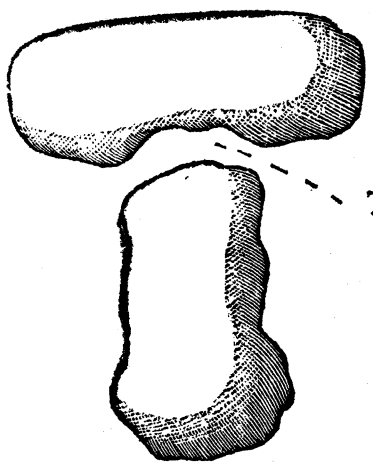
The Royal Society is collaborating with JSTOR to digitize, preserve, and extend access to *Philosophical Transactions (1683-1775)*. www.jstor.org

It looked black, and a little Hole broke open there, out of which the Water came; and a Stone appearing, the Hole grew wider by the Force of the Water, and his frequently touching it, till at laſt the Stone came away whole. It was broken afterwards by a Fall.

As ſoon as the Stone was come away he ſays that he grew eaſy, and the Swelling abated. The Wound is now reduced to a ſmall Compaſs, and the Water ſtill comes away through the Wound, and but very little Water comes out the natural Way.

William Jarman is about 30 Years of Age. He ſays, that the great End of the Stone came away firſt, which he ſuffered to lie at the Mouth of the Wound near a Fortnight, but he applied to no Surgeon.

An Addition *by the* Publiſher *to the foregoing Caſe.*



There they articulated or rubbed againſt each other, while in the Bladder; one having a round Head, the other a Cavity.

Figures of Stones which made their Way through the *Perinæum* of a Man at *Leyden*, *Anno* 1724. ſeen there by *C. Mortimer.*
